

Filtration Systems

- "Wicking Action" separation is **efficient**
- Removes Oil & semi dissolved solids
- Remove up to 1 ½ gal. of oil per hour
- Affordable, **Compact**, Portable, Lightweight
- Reuse wash water **on site!**

Oil / Water Separators & Filters

This highly **efficient** filtration system drastically reduces the amount of wash water you need on the job. As wash water is recovered into your reclaim system the filtration module **separates solids** and **oils** allowing you to **recycle and reuse** your wash water **on site** and \ or **discharge** to a septic sewer.

Inlet **pre-filter** removes large debris from incoming water before entering the system.

Filter media packs capture smaller sized particles and are **washable** and **reusable** filters.

Oil Skimmer removes floating oils from the unit.
(Optional –& not shown)

The cartridge filtration system consists of cleanable filters on 66gal and larger units for the **lowest** long term **cost** of any system made.

1" **discharge outlet** allows for easy discharge of filtered water. Attach garden hose and redirect the flow back to your water supply tank for re-use.

Lid with seal & fasteners allows for easy access to the inside of the unit.

Heavy duty reservoir Tank is very durable and **chemical resistant**.

Model OWS 5-300*

Distributed By:

MODEL	TANK SIZE	PPM @ 5 g	PPM @ 10 g	GPM
OWS 5-300*	44 gal	200	300	10
OWS 10-200	66 gal	50	200	15
OWS 10-125	66 gal	125	200	15
OWS 15-200	66 gal	50	125	15
OWS 10-50	100 gal	20	50	15

Auto-Pump Out Option available
Filtration – separation efficiency in parts per million at given volume
