

Sirocco™ Vacuum Reclaim Tools

Efficient, beefy, and effective, for affordability, performance, durability, reliability, serviceability, and long-term-low-cost.

VacuBerm- driveway suction device, which stops a flow of water from passing under it, depending on surface, weight added, suction from vacuum, debris influx, and flow of water, you can expect several gpm cleared with minimal vacuum. With our PEV2: 4 to 8 gpm with properly placed SandSnakes, on a pre-swept asphalt surface, at up to 100 ft. With an SGV, go hundreds of feet !

Gulper Wand- designed to suck sand out of railways at trolley stations, so you can rely on workspeed when you need to remove small trash, mud, or dirt. Cigarette-butts disappear in a flash !

Hard-Surface Wand- beefy ABS, or aluminum wand with abuseable floor tool for water removal. It has doubled squeegee blades that are replaceable. Other versions also available !

Vacuumping Surface Cleaner- All Stainless 3/8"QC's, sidekick wand, high-pressure filter, and the sweetest efficiency in this industry... only requires 200cfm to overcome 5gpm !

next... you'll see our new **40"** version Self-Propelled surface cleaner...

at 10 gpm it's capable of 15k to 20k sq.ft. per hour ! ...and 95 to 98% reclaim !
